Tejendra Chowdary Chaparala

Data Engineer

chaparala0@gmail.com 7671064102 Pune, Maharashtra

Profile

Data Engineer with experience in building scalable **ETL pipelines** and real-time data solutions. Skilled in **Databricks, PySpark, SQL, Delta Lake, Azure Data Factory, and Microsoft Fabric**. Strong problem-solving, analytical thinking, and collaboration skills to deliver high-performance, domain-driven data solutions in finance and legal sectors.

Professional Experience

Software Engineer-1, *HashedIn By Deloitte* 12/2025 – Present
Pune, India

- Built **SQL Server** to **Azure SQL** migration pipelines using **ADF**.
- Designed data load frameworks using table and stored procedure dependencies.
- Implemented incremental data loading using **CDC** and **RowVersion** for efficient data synchronization.
- Developed near real-time **ETL workflows** with 10-minute refresh cycles.
- Collaborated with **cross-functional teams** to deliver data solutions.
- Demonstrated strong **problem-solving, communication, and teamwork** skills.

Associate Data Engineer, *RandomTrees* 10/2024 – 12/2025
Pune, India

- Developed pipelines with **ADF, Databricks, PySpark**, and streaming data workflows.
- Designed **data models** and automated data quality checks.
- Coordinated with teams to deliver **scalable, high-performance solutions**.
- Showcased **adaptability, analytical thinking, and collaboration**.

Projects

Near Real-Time Banking Data Migration

- Migrated data from **SQL Server** to **Azure SQL** using **Azure Data Factory (ADF)**.
- Designed dependency-based table loading using referential and stored procedure dependencies.
- Implemented incremental data synchronization using **CDC** and **RowVersion**.
- Developed near real-time **ETL pipelines** with 10-minute refresh intervals.
- Ensured reliable and scalable data availability for downstream applications and reporting.
- **Technologies:** SQL, Python, Azure Data Factory, SQL Server, Git, Azure, Jira

Confidential Law Firm, Canada

- Implemented real-time ingestion using **Microsoft Fabric, SQL Server CDC, Debezium,** and **Azure Event Hub**.
- Enabled near real-time reporting by orchestrating end-to-end workflows.
- **Technologies:** Microsoft Fabric, Debezium, Azure Event Hub, SQL Server, Lakehouse, Streaming

Automated Data Platform for Finance Industry

- Developed **ADF pipelines** to ingest data from multiple financial sources into **Azure Data Lake (ADLS)**.
- Automated data cleaning, enrichment, and transformation using **PySpark** and **Spark SQL** for the silver layer.
- **Technologies:** PySpark, Spark SQL, Databricks, Azure Data Lake (ADLS), Azure Data Factory (ADF), SQL Server

Skills

ETL Tools: Azure Data Factory (ADF), SSIS
Big Data Technologies: Databricks, Microsoft Fabric
Programming & Scripting: Python, SQL, PySpark
Data Warehousing: Dimensional Modelling, Data Pipeline Automation
Cloud Platforms: Azure
Other: CI/CD, Real-Time Data Processing

Certificates

- Databricks Certified Data Engineer Professional

Education

Bachelor of Technology (B.Tech) in Computer Science, *Lovely Professional University* 2020 – 2024
Punjab, India

Higher Secondary Education, *Sri Chaintanya Junior College* 2018 – 2020
Andhra Pradesh, India
